Minutes: The motion was made, seconded and unanimous vote to waive the reading and to accept the minutes for the September 2023, meeting as previously emailed to the officers and board.

President's Report: Dave has been in regular contact with our counsel, Lee Smith. Mr. Smith is optimistic about opening shotgun back up with lead. Bob and Dave have another meeting scheduled with Lee Smith, Mark Moss, and county counsel, a representative from the state water board, and a few others on Wednesday, October 18th. Our counsel will be bringing Dwight Hoenig from Turner/McLane Environmental Consulting. He is good at this type of environmental fight.

The county has known since 1977 that shotgun's lead has been landing in the area on their property. Dave spoke with an old board member who stated this same fight happened years ago. At that time the trap houses were moved, with county's consent, so that the majority of the lead landed on the spray field. At that time the club insured the county that the only time trap would be open during the week would be Wednesdays and the shooting flag would be hung so they could see it.

Also, there is no proof that any lead is leaving the area of the landfill. The samples Mr. Moss took was on the county property and not from Martiez Creek. Dwight Hoenig plans to address this.

We are going to make it clear to the county that we are ready and willing to work with them on the BMPs down around the area of concern and we are already implementing BMPs on our end.

We encourage our members and anyone else concerned with the closure of trap to reach out to your county supervisors and suggest to them this is an ill-conceived venture on the part of Mark Moss.

Vice President & Senior Range Manager Report (SRM): Mike Hampton is noticing a lot of new faces at the range. Everyone seems to really enjoy how the range is being kept up. Lots of new RSO are coming out to open the range.
